

Mentathlete

Home computers. Do they send your brain to sleep – or keep your mind on its toes?

At Sinclair, we're in no doubt. To us, a home computer is a mental gym, as important an aid to mental fitness as a set of weights to a body-builder.

Provided, of course, it offers a whole battery of genuine mental challenges.

The Spectrum does just that.

Its education programs turn boring chores into absorbing contests – not learning to spell 'acquiescent', but rescuing a princess from a sorcerer in colour, sound, and movement!

The arcade games would test an all-night arcade freak – they're very fast, very complex, very stimulating.

And the mind-stretchers are truly fiendish. Adventure games that very few people in the world have cracked. Chess to grand master standards. Flight simulation with a cockpit full of instruments operating independently. Genuine 3D computer design.

No other home computer in the world can match the Spectrum challenge – because no other computer has so much software of such outstanding quality to run.

For the Mentathletes of today and tomorrow, the Sinclair Spectrum is gym, apparatus and training schedule, in one neat package. And you can buy one for under £100.
