

# CONTENTS

## Hardware

**The Dragon 32** We look at a computer made in Wales from a remarkable new chip. This micro has proved very popular since its introduction less than a year ago **130**

## Software

**Fact Finder** The old fashioned card index has been superseded by the database – a computerised method of organising information **124**

## Basic Programming

**Organise Your Program** How thinking ahead can help you avoid errors as you build up a program **134**

## Insights

**Miniature Engineering** New techniques now make it possible to build thousands of components on a tiny chip of silicon **121**

**Micros In Medicine** The computer joins the medical team – assisting the doctor, the administrator and the handicapped patient **126**

**Staying In Focus** Why a specially designed monitor is best for your computer. We take apart the engineering to reveal what lies behind the image on the screen **132**

## Passwords To Computing

**The Laws Of Thought** A 19th-century discovery is the basis of today's computer logic **128**

**Nerve Centre** The 'brain' of the computer is the CPU – the Central Processing Unit **138**

## Pioneers In Computing

**John von Neumann** The 'architect' of the modern computer **140**

## Next Week

• We review the Jupiter ACE, a low-cost computer and the only machine to use FORTH as its standard programming language

• We take a look at how computers are infiltrating the world of music, and what home computers have in common with professional synthesisers

• Sprites are the most convenient method for creating moving objects on a computer screen – we explain how they work
