

CONTENTS

APPLICATION

SENSE & SENSIBILITY Our robot series continues by looking at how robots can be made to 'sense' what is happening around them by fitting them with sensory devices

681

HARDWARE

SHOPPING AROUND We review 10 of the most popular home computers and give you some guidelines on buying

689

SOFTWARE

CALCULATING MACHINE Many home computers have spreadsheet programs written for them, and although they may lack the versatility of programs such as Visicalc, they can manage small business applications

692

COMPUTER SCIENCE

DRAGON SLAYER We develop a LOGO game for the Commodore 64 that fully exploits the machine's sprites potential

694

JARGON

GATES TO GRAY CODE A weekly glossary of computing terms

688

PROGRAMMING PROJECTS

CALLING COMMODORE We have developed a utility program that creates a list of variable names for the BBC Micro and the Spectrum, now we develop a program for the Commodore 64

700

MACHINE CODE

SUSPENDING OPERATIONS Interrupt routines suspend the task the processor is carrying out in order to convey information to it. We learn how to implement them in machine code

697

WORKSHOP

DISPLAY COUNTER We enhance our user port system by building a seven-segment display unit that will display the contents of the user port data in hexadecimal

685

REFERENCE CARD We continue to list extracts from the Z80 programmers' reference card

Next Week

■ The Plus 4 is the latest home micro from Commodore with a new look, new ROMs and a new version of BASIC. Our review measures it against the competition.
■ Having examined LOGO sprites on the Commodore 64, we investigate the Atari version.
■ A robot that can sense its surroundings and move purposefully amongst them is approaching intelligence. Our robotics series considers intelligent movement.

QUIZ

- 1) What happens to a 'grandfather file'?
- 2) What are decoders?
- 3) What do transducers do?
- 4) Where would you find the system variable 'PAGE'?

Answers To Last Week's Quiz

- 1) The five keywords on the MSX power-up display are the commands currently programmed into the function keys.
- 2) A UART is a Universal Asynchronous Receiver/Transmitter. It converts serial data into parallel and vice versa.
- 3) Cartesian co-ordinates are named after the 17th century philosopher, René Descartes, who founded analytic geometry.
- 4) The adventure game 'Star Trek', based on the American television series, was the model for Atari's 'Star Raiders'.
