

Hardware Focus

Apple IIe Developed from the first Apple home computer, this model is still a force to be reckoned with

349

Software

Speaking In Tongues We discuss some alternatives to the Basic language

344

Basic Programming

Assembly Lines We can now bring together the segments of our address book program

354

Insights

Going Places Transport systems rely heavily on computers. We examine their involvement

341

Shooting Stars Microcomputers can take over many tasks in astronomy, including positioning the telescope and maintaining a database of stars

346

Fully Loaded Winchester disks, now becoming available for home computers, offer huge storage capacity and fast access

352

Passwords To Computing

Step By Step Gray code provides a way of accurately measuring movement in computer controlled devices

348

Pioneers In Computing

Leonardo Torres This Spanish engineer first suggested linking computers over telephone lines

360

Sound And Light

Sound Qualities...Light Construction We look at sound generation on the BBC Model B and graphics on the Commodore 64

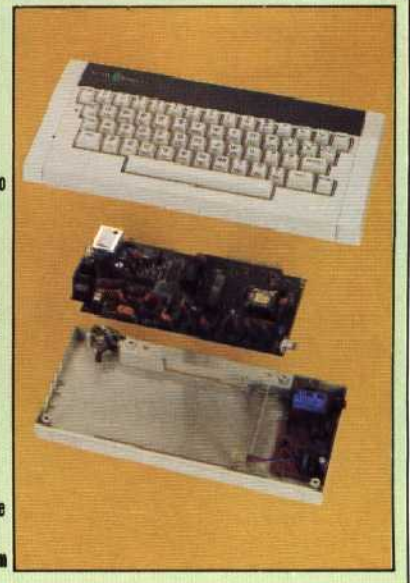

358

Next Week

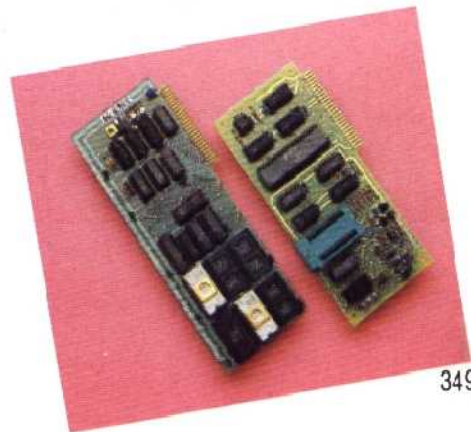

• The Acorn Electron is similar in many respects to the BBC Model B. We take a close look

• Solitaire and Patience used to be the most popular solo games, but since the development of the microcomputer you can play chess with a Grand Master and backgammon with an expert — any time you like

• Educational simulation software turns the computer into a science laboratory or even a whole expedition into the field. We look at programs for the BBC Micro and the Spectrum
