

CONTENTS

Hardware Focus

Jupiter Ace Introducing a low-cost home microcomputer based, unusually, on the programming language Forth **150**

Software

Spirited Graphics You can create your own graphic symbols and control their movement around the screen **152**

Planning Ahead A spreadsheet program will allow you to develop quite complex computer models to help you plan your finances **158**

Basic Programming

Fully Functional We continue our Basic course by looking more closely at functions — built-in sub-programs that will save you valuable programming time **146**

Insights

His Master's Voice Home computers can now be used to imitate a wide range of musical instruments **141**

Magic Wands Sophisticated technology and simple principles allow us to 'draw' directly onto the television screen **156**

Passwords To Computing

Properly Addressed We examine the system the CPU uses to store and retrieve information from its memory **144**

Pioneers In Computing

Steve Wozniak The teenage electronics wizard whose Apple computers set new standards in quality, and world sales **155**

Double Vision An old fashioned gimmick gets a new lease of life in computer games

COVER

Next Week

● Portable computers range from pocket- to small suitcase-size, but all offer a real measure of computing power. We take a look at this interesting new development

● Have you ever wanted to get inside a story, and take control? Adventure Games allow you to do just that — but watch out that the dragon doesn't capture you!

● We review Epson's HX-20 portable computer, the first machine to offer complete BASIC with a full range of commands and a built-in printer and cassette drive
